

# Compiled Logic Corporation Fact Sheet

## *Total Towing Lifecycle Management*

**C:LOGIC**

<b>Profile</b>	<p>Compiled Logic (C:LOGIC) provides services that allows cities, law enforcement, and storage lots to share information regarding non-consent towed vehicles (.i.e. accidents, illegally parked, snow emergencies, etc.) Because the system is multi-jurisdictional, citizens benefit from a single website where they can enter their plate number and find their car. Time, money and frustration are all drastically reduced because a missing vehicle can be located in minutes (not days or weeks).</p> <p>Municipalities and the private industry also benefit equally. Law enforcement agencies can spend more time protecting the public, instead of answering towing inquires or processing erroneous stolen vehicle reports. Towing and storage industry professionals can keep fees low and provide improved customer service through electronic towing and compliance reporting. Community leaders benefit from the positive image created and by serving the interests of those who elected them.</p>				
<b>Market Served</b>	Law enforcement agencies; state and local government; towing and storage industry; automotive, financial and insurance industries; and private citizens				
<b>Founded</b>	2004 (privately held), Acquired DTS Solutions – May 2008

<b>Key Customers</b>	City of San Francisco, City of San Diego, Orange County CA Sheriff, Bernalillo County Sheriff, City of Sandy Springs, Walker County, Texas, Fayetteville Police Department, Georgia Tech University				
<b>Services</b>	Automated Dispatch & Towing Management Disaster & Weather-related Emergency Towing Kits (Snow, Hurricane, Sweeping) Regional Vehicle Locator Initiatives Lien Holder Notification & Concierge Services Towing Leadership Consulting (Ordinance, Best Practices, RFPs, Strategic Assessments)				
<b>Key Technology</b>	Vehicle Information-sharing & Notification Service (VINS) is patent-pending technology that delivers an authoritative, multi-jurisdictional repository of towing data, enabling collaboration and information sharing among law enforcement, storage industry and citizens.				
<b>(SaaS) model</b>	<p>Law Enforcement Tow System (LETS) offers the agencies real time access to tow related services including voiceless tow dispatch, direct release notification and complete tow coordination. LETS provides a cost effective solution that dramatically reduces department staff time from field operations to administrative support.</p> <p>Tow Management System (TMS) delivers a call management and dispatch tracking system designed specifically for tow operators looking to fully integrate their business. TMS and LETS information synchronization provide exception-based compliance oversight, unified billing, and simplified management of vehicle holds.</p>
